

## ASSOCIATION MEETING

**DATE:** 20.09.2011

**CHIEF GUEST:** Dr.V.Sridevi.

Assistant Professor

Department of Chemistry

Lady Doak College, Madurai.

**TOPIC:** UG – REVISITING CHEMISTRY THROUGH NANOSCIENCE

On September 20, 2011, we conducted Chemistry Association Meeting for the benefit of our UG students. An innovative lecture on “Revisiting Chemistry through Nano science” was given by our chief guest Dr.V.Sridevi, Assistant Professor, Department of Chemistry, Lady Doak College, Madurai.

Each and every object we use in our day to day life can be looked out at Nano scale. Nano science is an interesting branch of chemistry which deals with Nano size particles, robots and machines. Our Chief Guest explained the Nano materials present in nature with beautiful examples. It made the session colourful and created interest among the students. Students eagerly listened to the lecture and learnt about Nano chemistry and its recent developments. Real life examples were illustrated with videos in a well manner. This session really helped our students to look chemistry in a different perspective.
