

**M.V.MUTHIAH GOVERNMENT ARTS COLLEGE FOR WOMEN.
PG AND RESEARCH DEPARTMENT OF COMPUTER SCIENCE.**

EXTENSION ACTIVITIES 2024-25

The third-year Computer Science students, along with their faculty members, visited "Government High School, Meenakshi Naicken Patty," Dindigul, as part of their Extension Activities. The primary objective of this visit was to impart essential computer fundamentals, basic concepts of software packages like MS Office, and an introduction to web designing languages such as HTML to students in grades 6 through 9. The students from the high school were highly engaged and enthusiastic while learning these concepts. Additionally, some of our students delivered motivational speeches, providing guidance on higher education opportunities and career paths. This initiative aimed to inspire and equip the young learners with valuable knowledge and insights for their future.
