1. About the College

M. V. Muthiah Government Arts college for women, Dindigul was established in the year 1966. The college is Reaccredited with Grade "A" by NAAC. The college has been providing quality education to the rural students in and around Dindigul District. The college offers 12 UG programmes, 11 PG programmes and 6 Departments are recognized for conducting M.Phil., Research Programmes. The college has almost 2871 students on its rolls in various programmes. The College campus is about 40 acres which include both built up area and open space.

2. About Botanical Garden

Of the 40 acres of the college, 17 acres are exclusively covered by Botanical Garden that has been established in September, 2016. This Botanical Garden is the first of its kind in Government Arts and Science College for Women, Tamil Nadu. The trees present in the premises and the botanical garden make an excellent green ecosystem in the college.

3. Objectives of Green Campus

The development of urban area due to the necessity of increased population on another side reduces the green coverage of our natural environment. Growing of tree species wherever possible not only provides a healthy life style for human population but also acts as a habitat for other species of plants and animals that is vital for the living environment.

The objectives of maintaining green covering of the campus are

- Providing a healthy environment in college campus
- Enhancing the awareness towards ecosystem and environmental protection.
- Creating awareness on cleanliness and pollution control.
- Making the students to study the species of plants, birds, insects and other small animals and improving their knowledge on biodiversity
- Reducing the noise and air pollution.

4. Number of plants and important plant species of College Campus

4.1. Number of species in the premises

There are a total number of 390 plants maintained in the college premises. 48 different plant species covers the total number of plants (390) of premises. The plants are from important herbs, shrubs and tree species of different categories (medicinal, ornamental and etc.). The habit of plants varied from herb, shrub, tree, climber and also epiphyte. There are a total of 286 tree species, 65 shrubs, 30 herbs, 9 climbers. The details of plants species such as their botanical name, local and common names and corresponding families are given in Table 1.

4.2 Key species of plants present in the premises

There are important medicinal herbs like *Catharanthus roseus*, *Ocimum sanctum*, *O. basilicum*, *Solanum trilobatum*, *Centella asiatica*, *Anisomeles malabarica*, *Coleus aromaticus* and *Bryophyllum pinnatum* maintained in the college. Important medicinal shrubs like *Morinda tinctoria*, *Datura metel*, *Abutilon indicum*, *Vitex negundo* and ornamental shrubs like *Tecoma stans*, *Ixora coccinea*, *Crotons*, *Nerium oleander* and Climber like *Bougainvillea spectabilis* are also grown in the college. Important tree species present in the premises are *Ficus religiosa*, *F. benghalensis*, *Senna siamea*, *Acacia leucophloea*, *A. auriculiformis*, *Melia dubia*, *Delonix elata*, *D. regia* and *Terminalia catappa*.

4.3. Number of species in the Botanical Garden

There are a total number of about 2012 plants maintained in the botanical garden of our college. Of these 2012 plants, 1808 plants are documented and a very few plants could not be identified. The plants are covered by 51 different plant species. The majority of (more than 95%) the plants consists tree species and the remaining are shrubs. These different species are represented by a total of 25 different families. The details such as botanical name, local and common names and corresponding families of the plants present in the garden are listed out and given in Table 2.

4.4 Major Plant families and important plant species of Botanical Garden

The different species maintained in the botanical garden are coming under a total number of 25 different families. The members of Meliaceae and Fabaceae are found dominant in the Botanical garden. There are medicinally as well as economically important tree species like *Azadirachta indica*, *Syzygium cumini*, *Pongamia pinnata*, *Calophyllum inophyllum*, *Tamarindus indicus*, *Terminalia chebula*, *T. bellirica*, *Phyllanthus emblica* and *Melia dubia*, economically important plants like *Tectona grandis*, *Pterocarpus santalinus* and *Acacia leucophloea* are present in the garden. The Botanical garden to its fame and holiness contains sacred tree species like *Ficus religiosa*, *Ficus benghalensis*, *Aegle marmelos*, *Crescentia alata*, *Elaeocarpus angustifolius* and *Lagestroemia speciosa*

5. Outcome of maintaining greening in Campus

The enormous plant diversity of the college premises and botanical garden of our college provides a rich biodiversity and great green coverage. The major outcomes from this are

- About 3150 students benefitted by visiting this rich biodiversity of the campus during environmental study field visit
- Created awareness among students, their parents, faculties and staff member on Green and Clean environment
- Sequestration of CO₂ level and reduced noise pollution inside the college campus
- Enhanced ecosystem development and management

RECOMMENDATIONS

1. Properly Maintained and found good
2. Helps for oxygen evolution inside campus
3. Greenary environment - for education campus
4. Pollution free campus
5. Enhances Bird population
